Voice Activation

ICR B30

Digital Notetaker

Using advanced digital technology, the Sanyo ICR B30 digital notetaker becomes your second memory allowing you to make notes or capture those fleeting thoughts as they happen. A built in 16Mb memory provides you with a maximum available record time of over 7 hours, at a very affordable price.

The on-board management system means each recording is individually time and date stamped, and then stored as a separate file in one of 4 folders.

The easy to read LCD display allows you to quickly navigate to the recording you want to playback or adjust the settings of the recorder.

Set the **ICR B30** to record in conference mode to capture the discussion of a small meeting or adjust the quality of the recording to extend available record time. Voice Activation (VAS) can also be selected for hands free recording.

Features:

- Built-in 16Mb memory
- Time and date stamp
- Auto Power-off when not in use
- Hold/Safety Lock
- High Quality / Long Play record modes
- Voice Activation
