Mini Portable Dictation Machines

Mini portable dictation equipment is the most popular choice for individuals that require a robust machine to withstand constant use.

One-touch recording and smooth slide controls allow an author to create perfectly drafted dictation or simply capture fleeting thoughts.

The tape-end alarm ensures you will never be unaware that the cassette has come to an end, and an LED light gives you a visual confirmation that a recording is being made.

The Mini Portable range is perfect for Doctors, Lawyers, Solicitors, Brokers, Accountants, Surveyors, Estate Agents and Insurers.
